

G.I. Lab Nurse's Prayer

Every morning, this I pray -
Lord help me make it through the day!
Please make every scope work like it should
And let all my actions be understood.
Please help each Doc to remain calm and cool
And let my clothes stay free of blood and stool.
Please make every patient kind and sweet
And cooperative until the work's complete.
Please give me the strength and the grace
To perform my best throughout each case.
Please never let me run out of any supplies
Or get stuck with the incorrect type or size.
Please make every experience so worthwhile
That I end each day with one big smile.
And when I'm cleaning up after the very last test,
Please let me make it home so I can enjoy some rest!
